

## WHO IS INVOLVED WITH THE DEVELOPMENT OF THE PRODUCT?

Bill Fligg is the president of Petro Buster Inc. Bill has 15 years experience in the Furnace Oil Heating Business and Petroleum Industry. He managed a business that sold approximately 50 million litres of petroleum a year. Bill dealt with furnace oil spills, and dealt with all issues associated to oil spills, including lawsuits and the environmental authorities. He has been involved with the Canadian Oil Heat Association for 15 Years as well. Bill noticed a remediation company using a formula that looked like soap to clean petroleum spills and researched what it was. The formula was eco friendly, safe to wash your hands with and yet it had microbes in it that naturally bio-degraded the hydrocarbons in Petroleum.

The formula was made by one of the largest biological companies in the world, "Novozymes", who have won international awards for their bio innovations and green product development. Bill not only branded that formula and marketed it around North America but also used it regularly on his own petroleum spills to reduce the environmental impact of a spill at "THE TIME OF THE INCIDENT" and not wait for politics and bureaucracy to exponentially increase the cost of remediation by waiting for days, sometimes weeks to stop the damage.

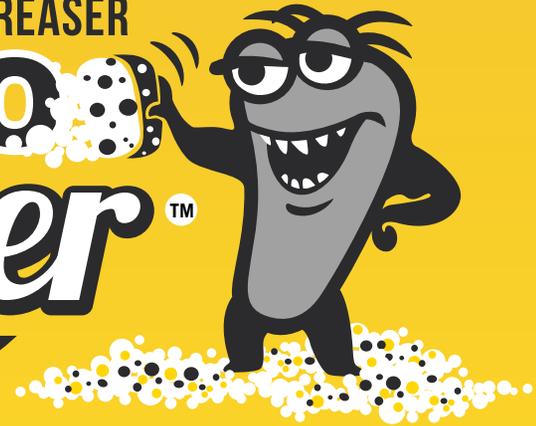

By acting quickly, Bill and his team were able to mitigate many major lawsuits and reduce many claims with this formula. Now this formula is available as Petro Buster for anyone who needs to clean up any petroleum related spills from soil, water, concrete, asphalt, fabrics and more.

INDUSTRIAL STRENGTH - NO SOLVENTS - NO PHOSPHATES  
ECO FRIENDLY SOAP WITH MICROBES & ENZYMES!

SPILL SOAP & ECO DEGREASER

## PROFESSIONAL GRADE PETROLEUM CLEANING PRODUCT THAT CAN BE USED BY ANYONE!

### WHAT IS PETRO BUSTER?

It is a completely biodegradable surfactant (soap) that breaks the barrier between petroleum and water, allowing it to be dispersed and removed from many surfaces. In addition, it has microbes and enzymes that break down the hydrocarbons in petroleum naturally. Whether you are cleaning fuel in the ground, on water or simply want to remove it from a wide variety of surfaces, Petro Buster does it in an Eco Friendly way.

### PETRO BUSTER IS A CLEANING PRODUCT WITH ENZYMES & MICROBES

It doesn't just clean hydrocarbon based pollution, it removes it completely from the environment by ingesting it and converting it to Water, Oxygen and Carbon Dioxide. It is a surfactant ie: soap base that also acts as a dispersant to help thin the density of a petroleum plume in the ground or water which will ultimately cause it to biodegrade naturally.

If you're trying to clean furnace oil spills, diesel fuel spills, oil spills, gasoline spills, grease or any petroleum product from concrete, asphalt, soil water or fabric, Petro Buster is the Eco Cleaner you're looking for!

### CLEANS PETROLEUM

#### CLEANS:

- Furnace Oil Spills
- Diesel Fuel Spills
- Gasoline Spills
- Motor Oil Spills
- Hydraulic Oils Spills

#### FROM:

- Soil & Water
- Concrete & Asphalt
- Fabrics & other surfaces

### CLEANS GREASE, OIL & GRIME

#### FROM:

- Cardlocks & Gas Pumps
- Pump Islands and Lanes
- Heavy Equipment & Trucks
- Tools & Machinery

Rinse Water will continue to remediate the ground after cleaning is done.

### PARTS CLEANER SOLUTION

#### NO SOLVENTS:

Use in your parts cleaner instead of Solvents.

Dispose of in shop drain to oil water separator instead of paying fees for hazardous waste removal.

### OTHER CLEANING USES

#### CLEANS:

- Grease from uniforms
- Soot from carpets and walls
- Automotive detailing
- Household grease & stains
- Marine bilge & hull
- RV siding stains

**SEPTIC & LAUNDRY SAFE!**
